SYDNEY JUPITER

SOFTWARE DEVELOPER

EXPERIENCE

Full Stack Developer @ Clearcare Solutions

July 2023 - May 2024 / Birmingham
Tech Stack: Vue, React, Typescript, Laravel, PHP, My SQL and Docker

- Making use of Eloquent Laravel models, classes as well as Controllers, Service methods , SQL queries and migrations in order to retrieve data and taking a restful approach to dealing API requests. Also writing Unit/E2E tests to cover backend changes.
- Implemented various new features to change the way user signatures works across our electronic forms, tables and reports.
- Revamped all audit tables on the staff website. Allowing users to see a table of details history of any changes made in their profile and other parts of the site.

Frontend Developer (Contract) @ Celer Technologies

March 2023 - June 2023 / Birmingham
Tech Stack: React, Typescript and Material UI

- Maintaining legacy financial app whilst helping with the migration over to React
- Communicating with the backend team in order to make sure all the relevant data is received and ready to be displayed in the frontend.

Full Stack Developer @ VesselsValue

April 2022 - March 2023 / Remote
Tech Stack: Javascript, Jquery, Tailwind, Vue, Typescript, SASS, PHP, Node.js, Symfony Laravel and Nuxt.js

- Migrating certain website features from legacy code such as Jquery to newer technologies such as Vue.
- Using tools such as Jira in order to maintain an agile workflow as well as updating and managing data through Heidi SQL.
- Attending various team meetings and workshops in order to keep up to date on the best coding principles.
- Dealing with REST API's as well as making various custom API, AJAX requests and sorting through JSON data responses.

Frontend Developer (Contract) @ X IS FOR TECH

June 2020 - April 2022 / Remote
Tech Stack: JavaScript, Tailwind CSS, React, Svelte.js, PHP, Laravel and Node.js

- Designing and building modern, user-friendly websites/web applications for various external clients.
- Working closely with the Lead Developer in order to shape solutions to meet client requirements and ensuring our projects meet accessibility, compatibility, and responsiveness requirements.
- Reviewing, testing and formatting code in order to ensure it's clean, functional and adhering to the most up-to-date conventional standards.
